

# Topology Seminar

**Achim Krause**

of Institute for Advanced Study will be speaking on

## On the K-theory of $\mathbb{Z}/p^n$

on April 1 at 4:30 in  
MIT Room 2-131

In recent and ongoing work with Antieau and Nikolaus, we compute algebraic K-theory of  $\mathbb{Z}/p^n$  and related rings. In this talk I want to give an overview of our approach based on prismatic cohomology.
