Chapter 1 Finite State Space, A Trial Run	1
1.1. An Extrinsic Perspective	1
1.1.1. The Structure of Θ_n	1
1.1.2. Back to $\mathbf{M}_1(\mathbb{Z}_n)$	3
1.2. A More Intrinsic Approach	5
1.2.1. The Semigroup Structure on $\mathbf{M}_1(\mathbb{Z}_n)$	5
1.2.2. Infinitely Divisible Flows	6
1.2.3. An Intrinsic Description of $T_{\delta_x}\mathbf{M}_1(\mathbb{Z}_n)$	7
1.2.4. An Intrinsic Approach to (1.6.1)	8
1.2.5. Exercises	9
1.3. Vector Fields and Integral Curves on $\mathbf{M}_1(\mathbb{Z}_n)$	10
1.3.1. Affine and Translation Invariant Vector Fields	10
1.3.2. Existence of an Integral Curve	11
1.3.3. Uniqueness for Affine Vector Fields	12
1.3.4. The Markov Property & Kolmogorov's Equations	13
1.3.5. Exercises	15
1.4. Pathspace Realization	16
1.4.1. Kolmogorov's Approach	17
1.4.2. Lévy Processes on \mathbb{Z}_n	20
1.4.3. Exercises	23
1.5. Itô's Idea	25
1.5.1. Itô's Construction	25
1.5.2. Exercises	31
1.6. Itô's Approximation Scheme	31
1.6.1. Itô's Approximation Scheme	32
1.6.2. Exercises	33
Chapter 2 Moving to Euclidean Space, the Real Thing	35
2.1. Tangent Vectors to $\mathbf{M}_1(\mathbb{R}^n)$	35
2.1.1. Differentiable Curves on $\mathbf{M}_1(\mathbb{R}^n)$	35
2.1.2. Infinitely Divisible Flows on $\mathbf{M}_1(\mathbb{R}^n)$	36
2.1.3. The Tangent Space at δ_x	44
2.1.4. The Tangent Space at More General $\mu \in \mathbf{M}_1(\mathbb{R}^n)$	46
2.1.5. Exercises	47
2.2. Vector Fields and Integral Curves on $\mathbf{M}_1(\mathbb{R}^n)$	48

2.2.1. Existence of Integral Curves	49
2.2.2. Uniqueness for Affine Vector Fields	51
2.2.3. The Markov Property & Kolmogorov's Equations	52
2.2.4. Exercises	53
2.3. Path Space Realization, Preliminary Version	55
2.3.1. Kolmogorov's Construction	55
2.3.2. Path Regularity	56
2.3.3. Exercises	58
2.4. The Structure of Lévy Processes on \mathbb{R}^n	58
2.4.1. Construction	59
2.4.2. Structure	64
2.4.3. Exercises	68
Chapter 3 Itô's Approach in the Euclidean Setting	72
3.1. Itô's Basic Construction	72
3.1.1. The Building Blocks	72
3.1.2. Goals	76
3.1.3. Important Preliminary Observations	78
3.1.4. The Proof of Convergence	83
3.1.5. Verifying the Martingale Property in (G2)	89
3.1.6. Exercises	94
3.2. When Does Itô's Theory Work?	95
3.2.1. The Diffusion Coefficients	95
3.2.2. The Lévy Measure	98
3.2.3. Exercises	101
3.3. Some Examples to Keep in Mind	102
3.3.1. The Ornstein–Uhlenbeck Process	102
3.3.2. Bachelier's Model	103
3.3.3. A Geometric Example	105
3.3.4. Exercises	106
Chapter 4 Further Considerations	108
4.1. Continuity, Measurability, and the Markov Property	108
4.1.1. Continuity and Measurability	108
4.1.2. The Markov Property	110
4.1.3. Exercises	112
4.2. Differentiability	112
4.2.1. First Derivatives	113
4.2.2. Second Derivatives and Uniqueness	119

Chapter 5 Itô's Theory of Stochastic Integration	122
5.1. Brownian Stochastic Integrals	122
5.1.1. A Review of Paley–Wiener Integral	123
5.1.2. Itô's Extension	125
5.1.3. Stopping Stochastic Integrals and a Further Extension . . .	128
5.1.4. Exercises	131
5.2. Itô's Integral Applied to Itô's Construction Method	134
5.2.1. Basic Existence and Uniqueness Result for S.D.E.'s	134
5.2.2. Subordination	138
5.2.3. Exercises	140
5.3. Itô's Formula	141
5.3.1. Exercises	146
Chapter 6 Applications of Stochastic Integration to Brownian Motion	148
6.1. Tanaka's Formula for Local Time	148
6.1.1. Some Properties of Local Time	153
6.1.2. Exercises	157
6.2. An Extension of the Cameron–Martin Formula	157
6.2.1. Introduction of a Random Drift	158
6.2.2. An Application to Pinned Brownian Motion	164
6.2.3. Exercises	168
6.3. Homogeneous Chaos	171
6.3.1. Multiple Stochastic Integrals	172
6.3.2. The Spaces of Homogeneous Chaos	175
6.3.3. Exercises	179
Chapter 7 The Kunita–Watanabe Extension	183
7.1. Doob–Meyer for Continuous Martingales	183
7.1.1. Uniqueness	184
7.1.2. Existence	186
7.1.3. Exercises	188
7.2. Kunita–Watanabe Stochastic Integration	189
7.2.1. The Hilbert Structure of $\mathcal{M}_{\text{loc}}(\mathbb{P}; \mathbb{R})$	190
7.2.2. The Kunita–Watanabe Stochastic Integral	192
7.2.3. General Itô's Formula	195
7.2.4. Exercises	196
7.3. Representations of Continuous Martingales	199
7.3.1. Representation via Random Time Change	199
7.3.2. Representation via Stochastic Integration	202
7.3.3. Skorohod's Representation Theorem	206

7.3.4. Exercises	210
Chapter 8 Stratonovich's Theory	214
8.1. Semimartingales & Stratonovich Integrals	214
8.1.1. Semimartingales	214
8.1.2. Stratonovich's Integral	216
8.1.3. Ito's Formula & Stratonovich Integration	218
8.1.4. Exercises	220
8.2. Stratonovich Stochastic Differential Equations	222
8.2.1. Commuting Vector Fields	223
8.2.2. General Vector Fields	225
8.2.3. Another Interpretation	228
8.2.4. Exercises	230
8.3. The Support Theorem	231
8.3.1. The Support Theorem, Part I	233
8.3.2. The Support Theorem, Part II	234
8.3.3. The Support Theorem, Part III	237
8.3.4. The Support Theorem, Part IV	239
8.3.5. The Support Theorem, Part V	243
8.3.6. Exercises	248
