18.997 References

A few references or papers on polytopes.

- Alexander Barvinok, "A course in Convexity", AMS, 2002. A very nice treatment of convexity (contains many results for polytopes which extend to convex sets).
- G. Blind and R. Blind, "Shellings and the Lower Bound Theorem", Disc. & Comput. Geom., 21, 519–526, 1999. A proof of $h_2 \geq h_1$ for simplicial polytopes using shellings.
- Branko Grünbaum, "Convex Polytopes", Wiley, 1967. The reference on polytopes. It was just revised and updated by Volker Kaibel, Victor Klee and Günter Ziegler and will be published by Springer-Verlag (May 2003).
- Gil Kalai, "Rigidity and the Lower Bound Theorem", Invent. Math., 88, 125–151, 1987. The proof of the lower bound theorem through infinitesimal rigidity and stresses.
- Gil Kalai, "Polytope skeletons and paths", in: Handbook of Discrete and Computational Geometry (Goodman and O'Rourke, eds.), 2002. Survey available from
`http://www.ma.huji.ac.il/ kalai/ch19.ps`
- Gil Kalai, "Some aspects of the combinatorial theory of convex polytopes", in : Polytopes, Abstract Convex and Computational, (T. Bisztriczky et alls, eds) pp. 205-230. Survey available from
