

**ERRATUM FOR:
TROPICAL CONVEXITY VIA CELLULAR RESOLUTIONS**

FLORIAN BLOCK AND JOSEPHINE YU

There was an error on page 113 of the paper “Tropical convexity via cellular resolutions” by Block and Yu, *Journal of Algebraic Combinatorics*, volume 24, issue 1, August 2006, pages 103–114.

The formula for the exponential generating function in Proposition 15 was incorrect. Hence the statement of the proposition should read:

Proposition 15. *The ordinary generating function for the numbers $M_{r,n,k}$ of maximal k -faces of the tropical cyclic polytope $C_{r,n}$ is*

$$\sum_{r \geq 1, n \geq 1, k \geq 0} M_{r,n,k} x^r y^n z^k = \left(\frac{xy}{1-y} + \frac{yx^2}{1-x} \right) / \left(1 - z \left(\frac{xy}{1-y} + \frac{yx^2}{1-x} \right) \right).$$
